2305726  Sociology Of Deviance and Social Control
The course is designed to examine social deviance in society with focus on the theories and types of deviance. It also discusses the social control methods used to face the problem.
(2305707) Advanced Analysis of Social Data

The course aims at establishing a conceptual and practical base on the sources of social data as well as the advanced statistical techniques for handling and analyzing data on social variables by graduate social sciences students.

The course includes the advanced methods of multivariate analysis of social data that graduate Sociology students need to use in their research. The course focuses on the assumptions underlying these methods and the cases when such methods can or can not be used rather than their mathematical derivation.

The course takes into consideration the levels of measuring social variables when selecting the appropriate methods to be used in analyzing social data.

(2305721) Sociological Topics in English

The course aims at exposing graduate students in Sociology to a selected variety of sociological topics. The topics will be equally selected from three different domains: (1) Sociological theories (2) Recent empirical research published in key international sociological journals (3) Proceedings and programs of actions that came out of major international conferences such as: the Social Development Summit, the International Conference on Population and Development and the International Conference on Women.
