### **Biographical Sketch**

I completed my Ph.D. in Human Geography at the University of Newcastle, NSW, Australia. I specialized in Services planning and using advanced computer technologies, namely Geographic Information Systems (GIS). I have experience in the field of Population Studies and Planning using GIS. My Ph.D was an applied study of planning the location of education services for populations in a rural area of Jordan. I used location-allocation models to analyse the data and presented the results in a GIS environment. This applied study counts for 3 years' experience in the planning field. Applied research was also involved in my Masters of Population Studies, completed at Jordan University, and counts for an additional 3 years' experience in the field. In Australia I have gained invaluable experience working as a research assistant for 2 years in the Justice Policy Research Centre at the University of Newcastle. I also have 5 years' experience as a Geography teacher in secondary high schools in Jordan.
