

ADVANCE YOUR CAREER THROUGH AN INTERNSHIP OR PHD SCHOLARSHIP IN SINGAPORE

Agency for
Science, Technology
and Research

Advanced Digital Sciences Center (ADSC) seeks top students with interest and experience in computer vision, image processing, machine learning, computer-human interaction, networking and/or security. Our research projects focus on real-time, large-scale data analytics, visualization of such data and cybersecurity, emphasizing interactive, human-in-the-loop systems supporting real-time response in urban settings. ADSC offers the opportunity to consider a career in research and contribute to an ongoing cutting-edge research project while building professional connections.

Established in 2009, ADSC is a research center in Singapore (SIN) operated by ECE and CS faculty of the University of Illinois at Urbana-Champaign (UIUC) and core-funded by Singapore's Agency for Science, Technology and Research (A*STAR). ADSC currently employs more than 70 full-time research staff and students from around the world. Singapore is a vibrant and beautiful tropical city-state located in the heart of southeast Asia.

An urban melting pot of different cultures and lifestyles, Singapore boasts a bustling economy, top universities and provides unique resources and research opportunities.

INTERNSHIPS:

Internships are available year-round, generally lasting three months, and primarily designed for upper-level currently registered undergraduate or masters students in computer engineering and/or science. Our internships expose you to research and immerse you in working on real-world projects. Current PhD students from non-Singaporean universities can apply for a one to two year internship under the ARAP program.

PHD SCHOLARSHIPS:

Students with first-class honors who are interested in carrying out research at ADSC may apply for PhD scholarships supported under A*STAR's Awards & Scholarships programs. Singaporeans or graduates of SIN universities who become a citizen can earn a PhD from UIUC (AUIP) and international students can earn a PhD from SIN universities (SINGA).

Researcher and engineer positions are also available to graduates.

APPLY BY VISITING:
